Subject: NG OU3 RW 21 Project - Town Approves 1 of 2 Permits

OU3 – RW 21 Project Area (Off site Ground Water Remedy)

The Town of Oyster Bay has approved Northrop Grumman's permit application to install the RW 21 extraction well and the 4 vertical profile borings associated with the proposed RW 22 Well.

NG contractors are onsite at NG property prepared to mobilize to the RW locations tomorrow Wednesday July 13, pending NYSDEC issuing written approval of the Northrop Grumman RW 21 Area Work Plan submitted June 2, 2016!

Six home owners and their family's from the proposed RW 20 location (Williams Street and Broadway) appeared at town hall to protest the Town's consideration of Northrop Grumman's RW 20 well permit application. The Town board informed the owners that Northrop Grumman withdrew (per the town's instructions) that application pending further investigation of alternate well locations.

Thank You
Ed
